

## SharePoint on your iPhone

There are more than hundred million SharePoint users worldwide and the number of iPhones sold has passed thirteen million.

Webstate combines these two worlds, providing you fast, easy and secure access to your SharePoint environment, directly from your iPhone.

### Main Features iSharePhone

- Navigate through your SharePoint Portal, Team Sites, Lists, Document Libraries, Links, Announcements and other SharePoint content.
- View documents: doc, docx, dot, xls, xlsx, ppt, pptx, html, mht, txt, gif, jpeg, tiff, png, pdf, numbers, pages and keynote.
- The iPhone does not support msg files, but iSharePhone enables you to view the msg files (e-mails) in your mail enabled SharePoint Document Libraries.
- Email documents directly from SharePoint to any recipient without downloading the file to your iPhone.
- SharePoint full-text search.

### Soon available for download

You will soon receive an email notification when iSharePhone is available in the App Store. After the installation on your iPhone, you can immediately experience iSharePhone by connecting to our demo SharePoint environment. If you want to connect to your own SharePoint environment, you will have to download and install the iSharePhone server component.

## Free download!

iSharephone will be available for free download in the App Store. iSharephoneServer will be free to use for up to 2 iPhone users. Any further details about pricing will be announced after the launch.
